## Software-defined vertical industries: transformation through open source

How open collaboration enables user-centered innovation, achieving faster development cycles, time to market, and increased interoperability and cost savings.

A Publication of The Linux Foundation | September 2020

# Why Open

Networking & Edge

Market Creation, Adoption Acceleration &  
Collaboration**

NEWS

## 2 SDO or OSS

Is it Standards OR Open Source?

“Harmonize” was a hot word 3 years ago

Unification well beyond Standards - now Open Source communities, Markets, Verticals are taking direction from the LFN playbook

**Linux Foundation Projects are harmonized with Standards**

# 3

## Why Contribute?

Open Networking

Open Edge/IOT

Open RAN

Open Enterprise

Open Cloud

Open Source Software

Open Testing & Interop

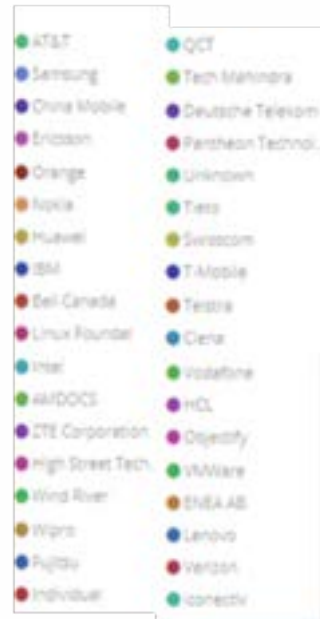

*accelerated by*

ONAP, OPNFV, CNTT, ODL, O-RAN, Akraio,  
EdgeX, CNTT, OpenStack and Kubernetes  
*among other projects*

## From Consumption to Contribution

14,132 Commits  
439 Code Authors  
200 Repositories

34 Organizations  
Contributing Code

**4 of the Top 10 Contributions in ONAP  
Frankfurt release from End Users**

4

## POC to Production

Open Compliance & Verification

Open Interop & Testing

Open Training & Certification

1. LFN EUAG (operational)
2. (NEW) End User Edge Vertical Solutions Group
3. (NEW) Certified ONAP Professional

**OPNFV, CNTT, Akraino Blueprints  
leading Open Interop & compliance**

## From Specifications to Deployments

**CNTT**

*"Everyone benefits, vendors don't have to build one-off architectures for every single telecom customers, and operators don't have to devote resources to building potentially unsupportable infrastructures"*

- Beth Cohen, Verizon

*"This project has a significant impact on both CNTT and OPNFV, and much is at stake. I look forward to seeing this project through to a successful conclusion."*

- Scot Steele, AT&T

Research and Reports

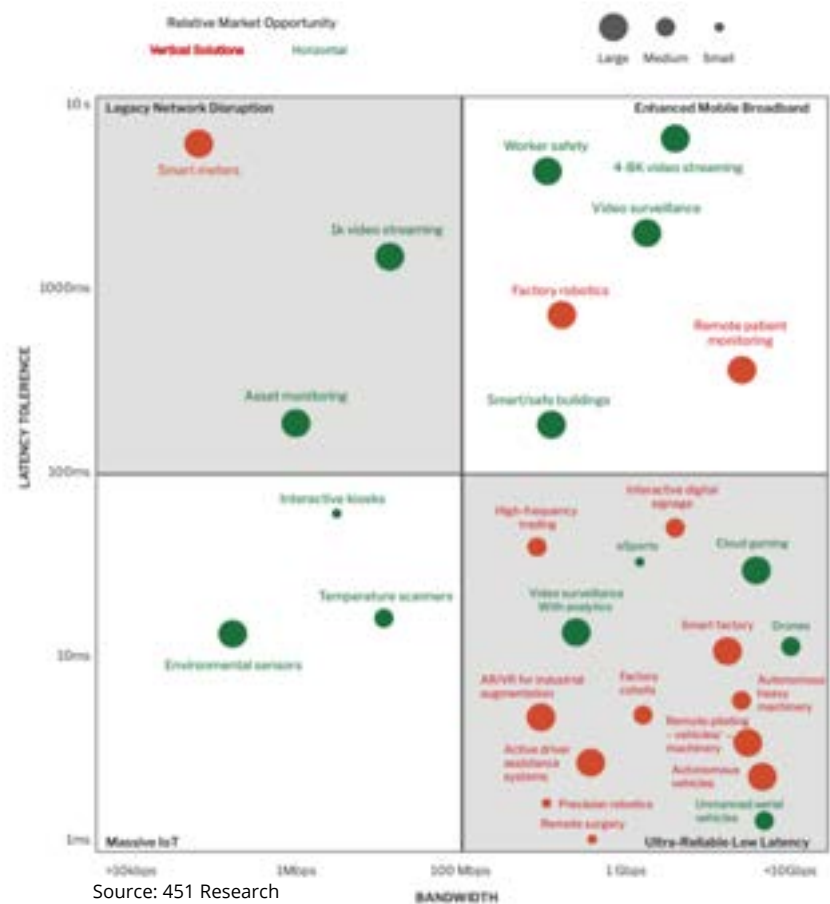

# 5G and Edge Critical in the Next Battle, a new normal!

Edge is 4X the size\* of Cloud Market!

“As businesses and governments establish their own new normal, **5G and Edge computing** will be necessary to deliver the automation, performance and cognitive insight required by many industries—including manufacturing, healthcare, energy and utilities, among others. Telecom operators will need to embrace open ecosystems to externalize innovation and accelerate new services.”
