

OPEN SOURCE NETWORKING DAYS

Open Source Built Private 5G Industrial Network
- from Beta to Alpha

Hsu-Tung Chien / Alpha Networks Inc.

- What is the private network for industries?
- Why cellular networks then 5G SA?
- Architecture of cellular networks
 - LTE, 5G-NSA , and 5G-SA
- How to build your own with open sources?
- Move your solution to market

Who am I

- 簡旭彤
- Hsu-Tung Chien
- ht.chien@alphanetworks.com
- Experience
 - Alpha Networks Inc.
 - Associated project manager, Nov. 2020 – present
 - National Chiao-Tung University
 - Postdoc, Mar. 2020 – Oct. 2020
 - O'Prueba Technology Inc.
 - Associated technical manager, Aug. 2019 - Dec. 2019
 - Industrial Technology Research Institute (ITRI)
 - Intern, Jul. 2014 - Oct. 2019
 - 4G & 5G EU-TW Projects
- Education
 - National Chiao-Tung University
 - Ph.D. Sep. 2017 - Oct. 2019
 - M.S. Sep. 2014 - Jun. 2017
 - Tung-Hai University
 - B.S. Sep. 2010 - Jun. 2014

Introduce to Alpha Networks Inc.

- **Vision**

- Forging the Internet to connect people and things.

- **Mission**

- ALPHA Networks is a globally recognized, professional networking DMS supplier.
- We use advanced technology to provide our customers with outstanding solutions at the best value.

ALPHA Networks, your reliable networking partner!

5G Next Generation Solution

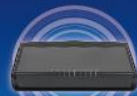

5G NR
Small Cell

Wi-Fi 6
Router

5G NR
CPE

XGS-PON
ONT / OLT

Smart
ADAS
Radar

AIoT
MEC
(DU+CU)

Fronthaul
/ Backhaul
Switch

100G/400G
Data Center
Switch

Surveillance
Fixed Dome

What is the Private Network for Industries

- **Autonomy**

- **Device**

- used exclusively by devices authorized by the end user industries.

- **Location**

- deployed in one or more specific locations

- **Data**

- keeps sensitive data at local

- **Management**

- self-determined network for specific situation such as capacity, coverage or associated policies which are access control, data privacy, QoS, the required SLA, and so on.

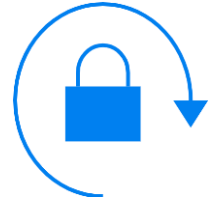

Why Cellular Network

- **Security**

- Cellular-grade level security

- **Specified & Optimized**

- for specific enterprise services to reach quality of service and latency requirements

- **Coverage & Interoperability**

- Outdoor/Indoor, Global standard vast ecosystem

- **Dedicated**

- Dedicated frequency for mobile private network (e.g., Band N79 4.8-4.9 GHz in Taiwan)

- **Agility, Sensitive & Reliability**

- Edge computing in standard and telco-grade reliability also synchronization (URLLC and TSN)

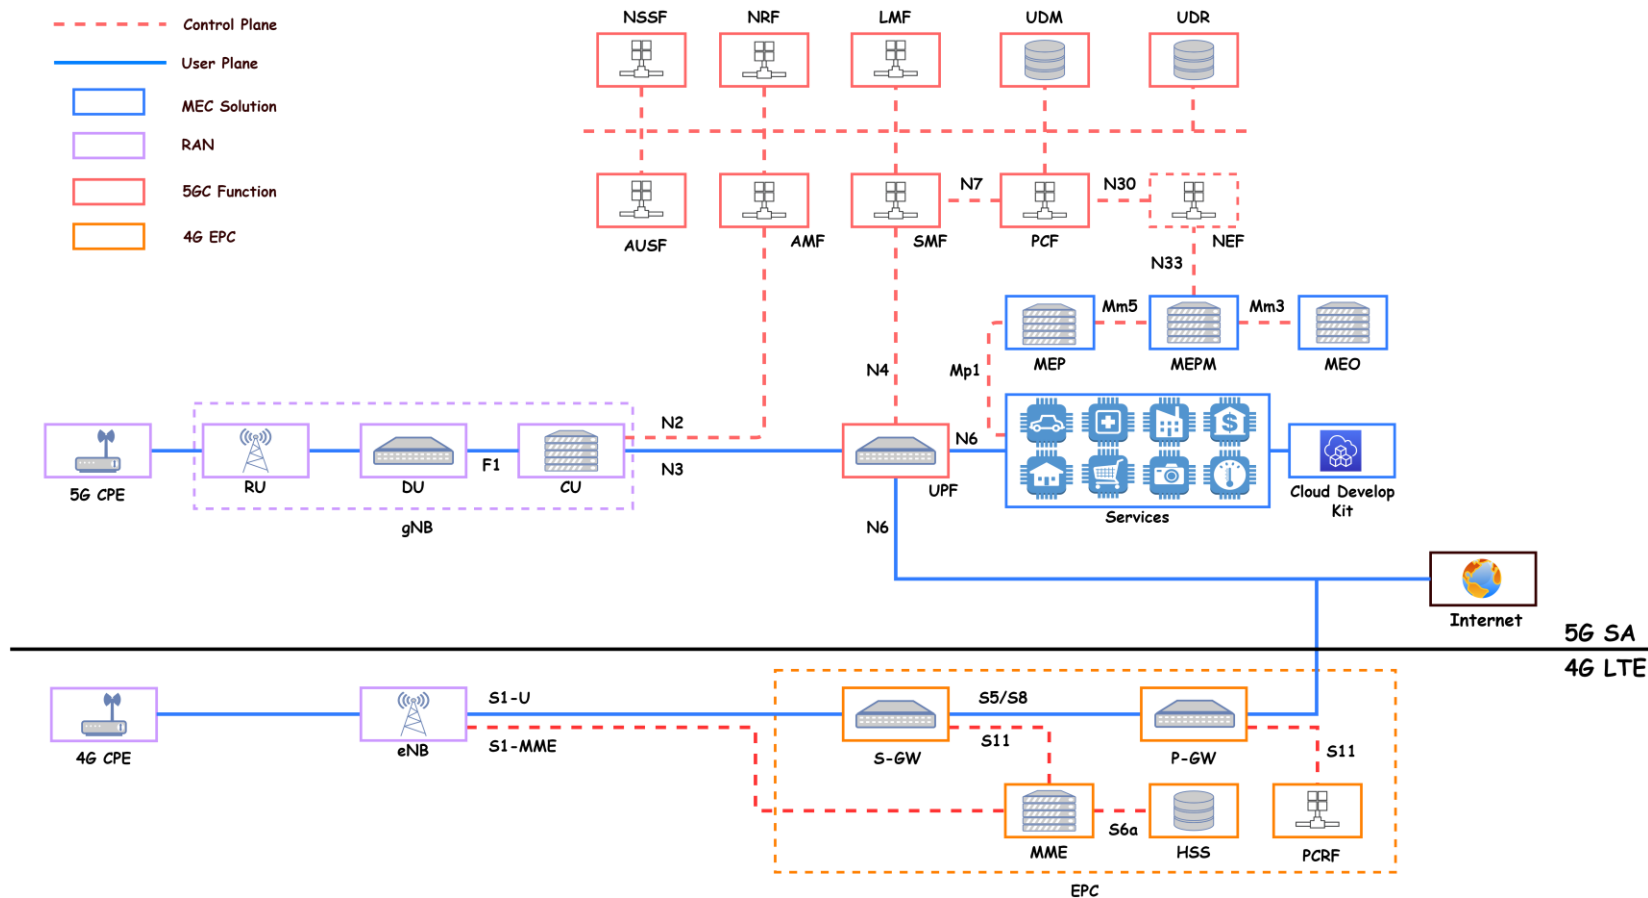

- **Enhanced Security and Capacity**

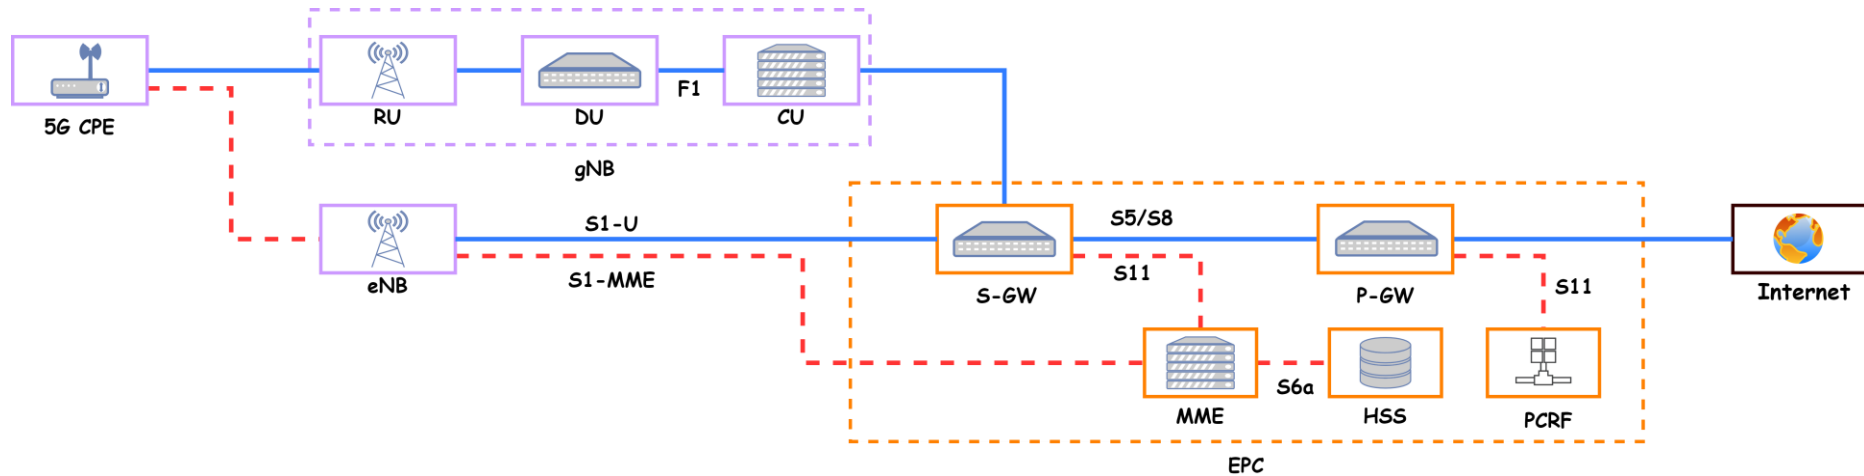

- Secure radio site and high data rate with low latency

The Arch. of 5G SA and 4G LTE

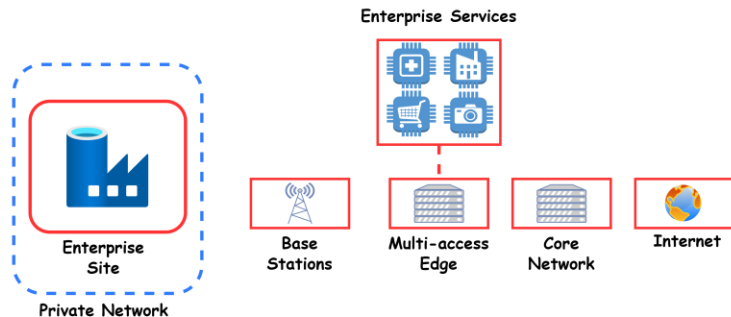

The Arch. of 5G NSA

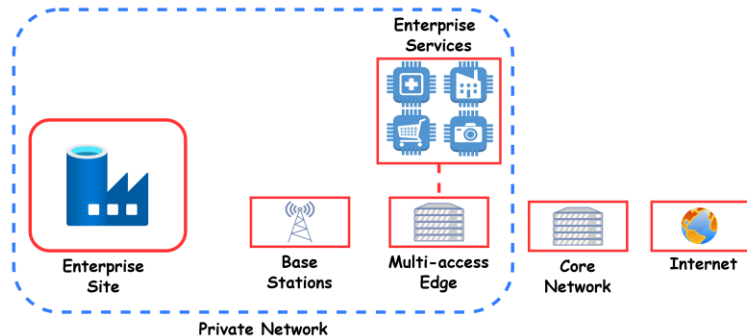

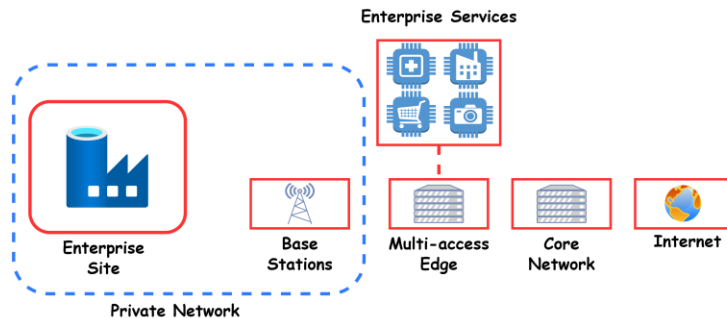

Different Cases

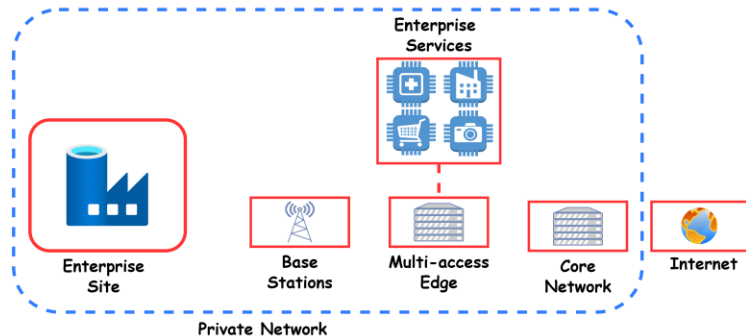

Network Slicing

Dedicated Base Station

Dedicated Base Station & Edge Server

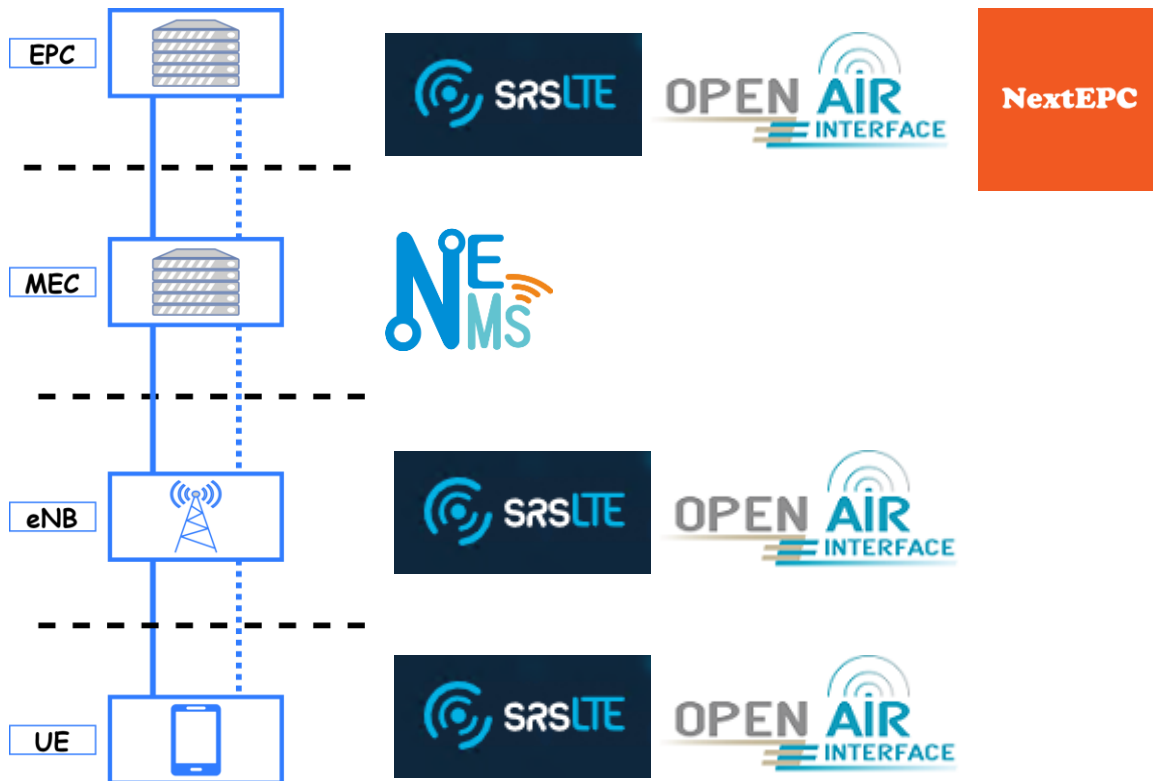

Dedicated Mobile System

Build your own - 4G LTE

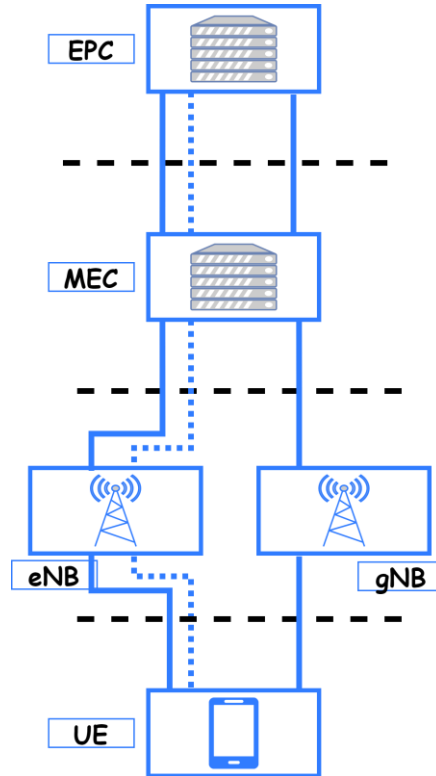

- **Core network**
 - srsLTE
 - OpenAirInterface
 - nextEPC
- **MEC**
 - NCTU NEMS
- **RAN**
 - srsLTE
 - OpenAirInterface
- **Simulated UE**
 - srsLTE
 - OpenAirInterface

Build your own - 5G-NSA

- **Core network**
 - OpenAirInterface
 - Open5GS (nextEPC)
- **MEC**
 - NCTU NEMS
- **RAN**
 - OpenAirInterface
- **UE**
 - OpenAirInterface

Build your own - 5G-SA

- **Core network**

- free5GC
- Open5GS
- OpenAirInterface

- **MEC**

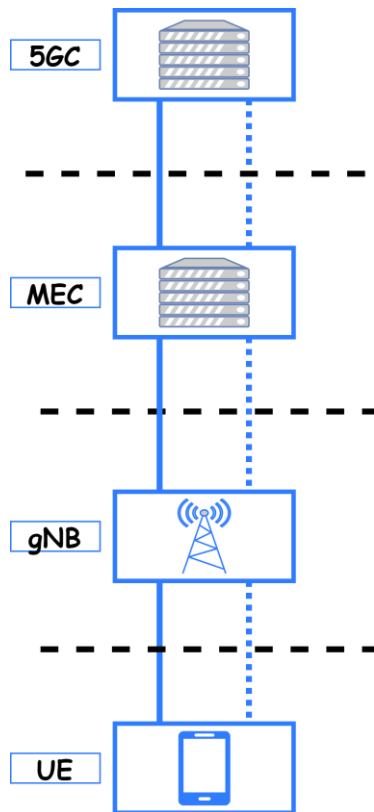

- N/A

- **RAN**

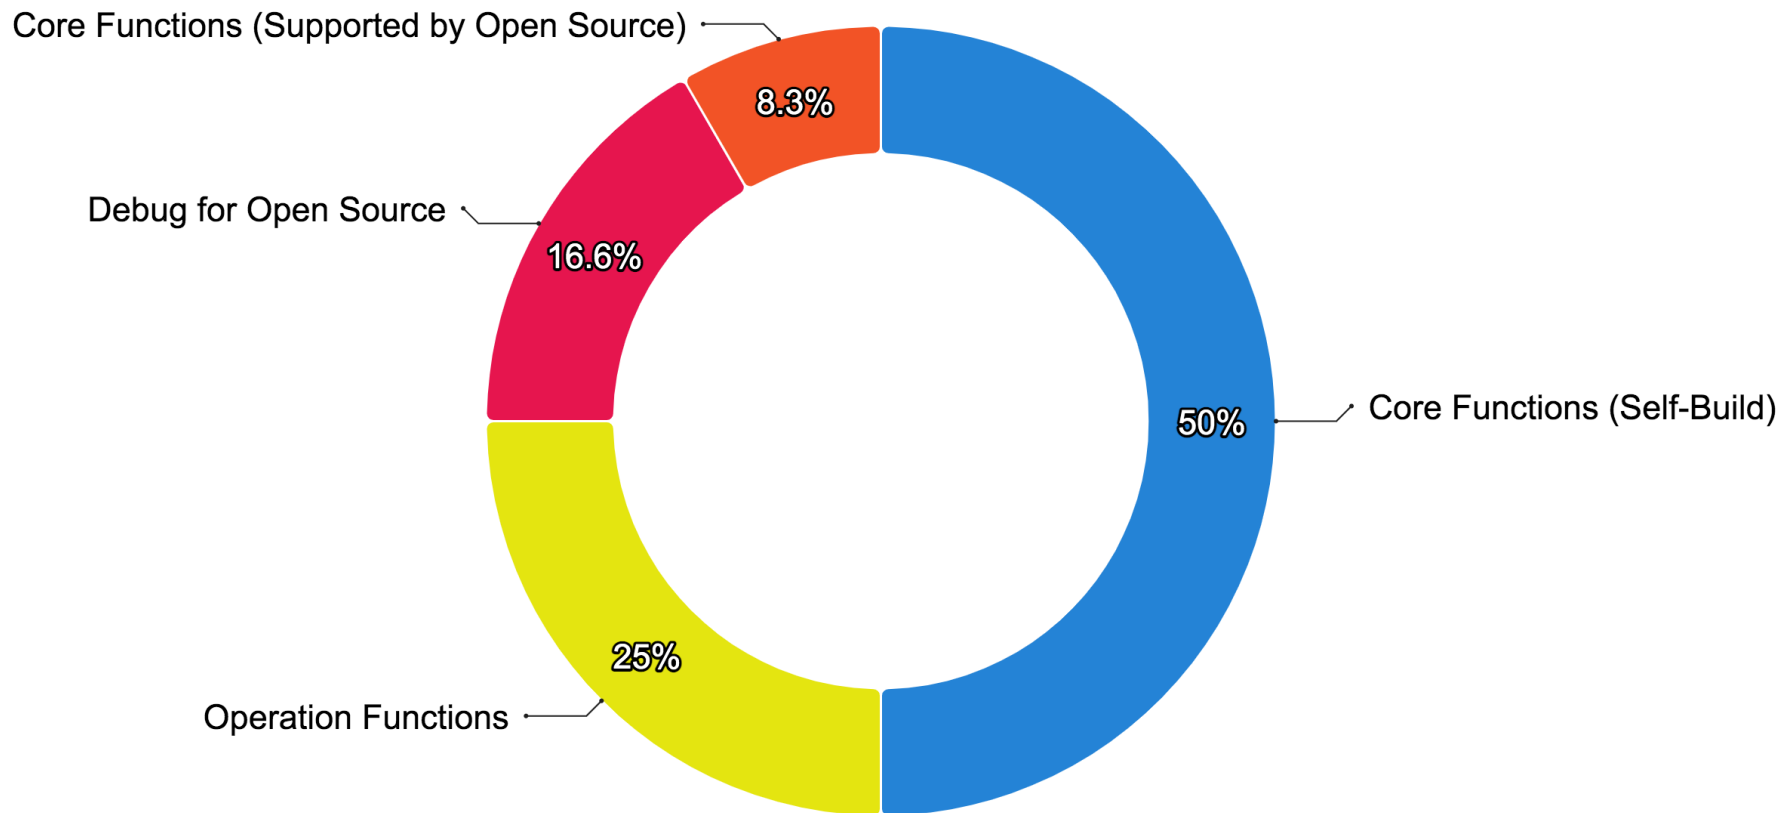

- N/A

- **UE**

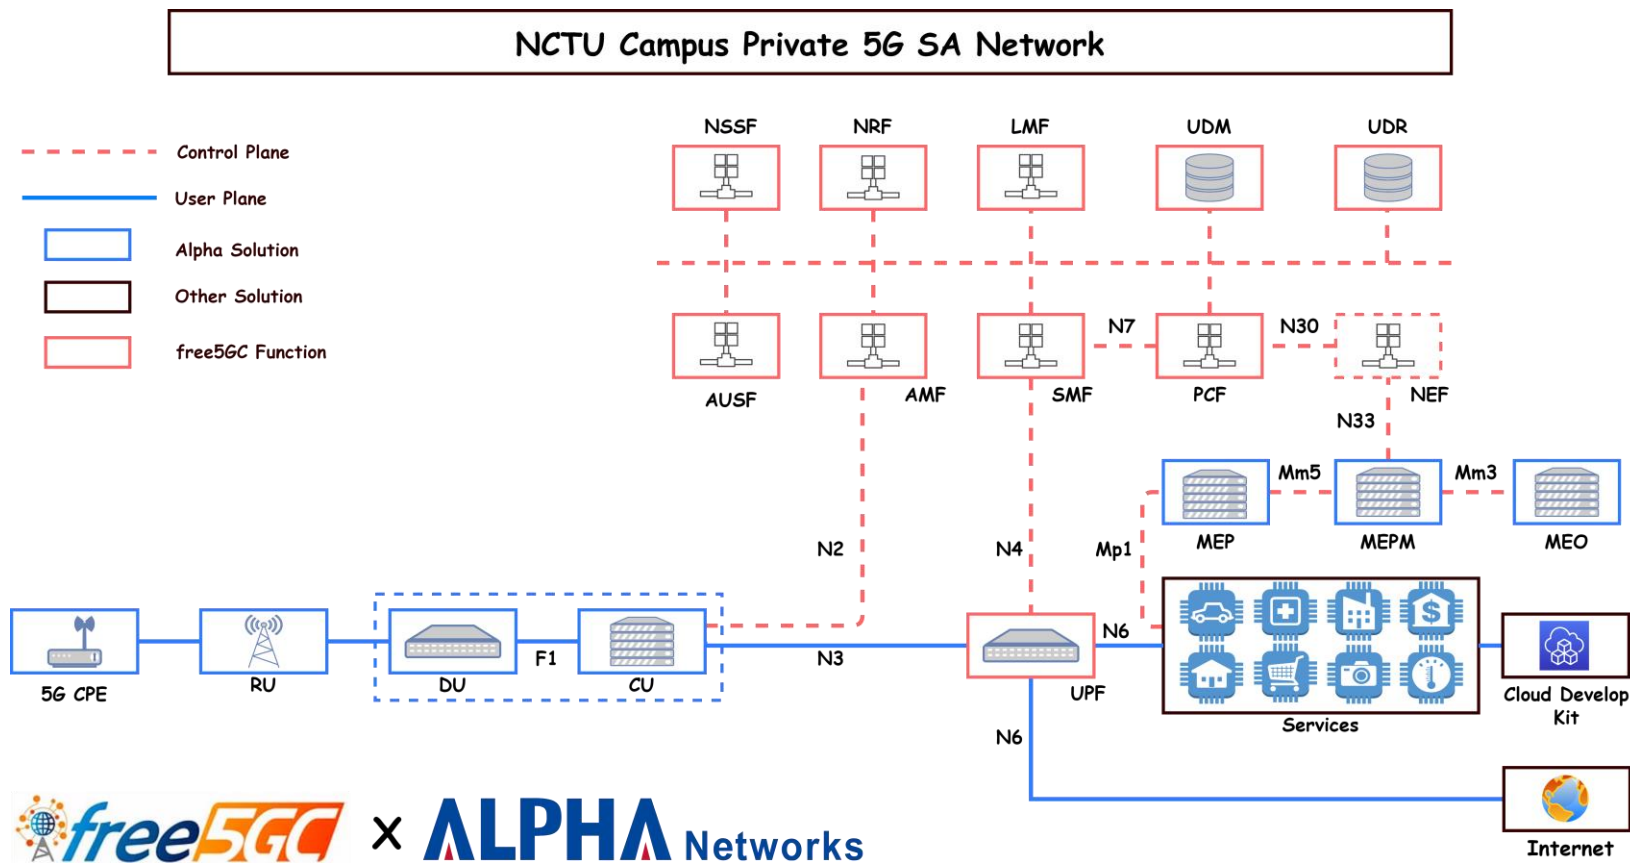

- N/A

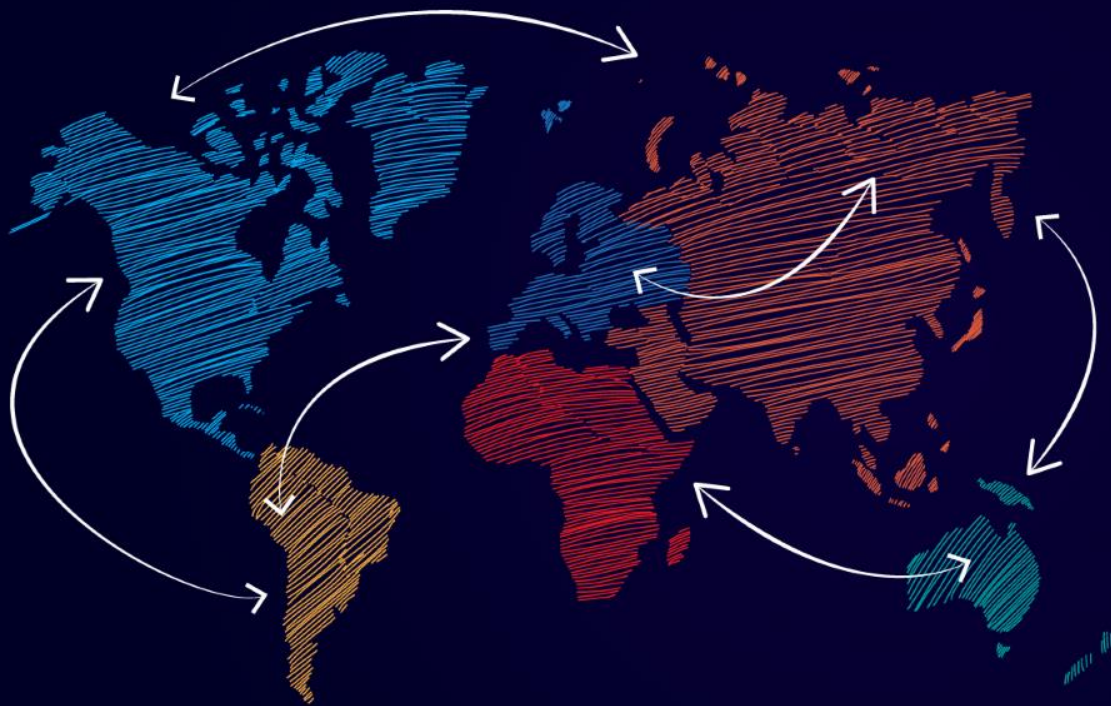

Move your solution to market

5G Private Network at NCTU (Band N79)

Thank you for
your attention!
